

- 2. 7. Speaking -

Working individually, you have to prepare a presentation about Windows Server.

You must use the vocabulary that we have studied in class.

You have to choose a Windows Server feature and prepare a presentation file (using Google Drive Presentations, OpenOffice Impress, Microsoft PowerPoint...), where you will explain in detail a particular Windows Server feature.

Here you have some examples:

- Installation and configuration.
- Domains and Active Directory.
- Examples of Domains, Trees and Forests in real businesses.
- Active Directory Domains and Trusts.
- Active Directory Sites and Services.
- Active Directory Users and Domains.
- Active Directory: AGDLP Strategy.
- Group Policy Management.
- Dynamic Disks.
- RAID configurations.
- Quotas.
- Backup, restore, and recovery.
- DHCP Server.
- DNS Server.
- Web Server (IIS).
- FTP Server (Web Server, IIS).
- Windows Server Backup.
- Exchange Server.
- Exchange Online.
- Azure.
- Azure Domain Services.
- How to use Active Directory in a real High School.
- How to create a CPD to have an AD DS.

If you have another idea for your presentation, you can tell that idea to the teacher so he can approve your idea.

After you have prepared the presentation, you must show it to the teacher.

Finally, you must represent the scene to the whole class, without reading any papers (you can show your presentation on the screen).
